

CORTUS, DOLPHIN Integration and RAISONANCE form a partnership for the cores of price-sensitive high-performance SoC

The Cortus logo features the word "cortus" in a lowercase, rounded, sans-serif font. The letter "o" is stylized with a white dot in the center.The Dolphin Integration logo consists of a stylized blue dolphin head profile on the left, enclosed within a square grid of blue dots. To the right of the grid, the words "DOLPHIN" and "INTEGRATION" are stacked in a clean, uppercase, sans-serif font.

Grenoble, FRANCE, December 6, 2007 –DOLPHIN Integration proudly announces their partnership with CORTUS extending to high-end Controllers their cooperation with RAISONANCE.

The Provider of Virtual Component of Silicon IP thus extends its microcontrollers range, from the legacy i8051 already enriched as Flip8051/251, to the APS3-2051: it enables a cost-effective move toward the 32-bit microcontroller market.

Initial Applications are aimed at the High Resolution and Wide Reach Industrial markets with multi-domain technologies: MEMS... as well as the nascent market for migrating Smart Card applications upwards.

Their partnership enables the three companies to enhance their offering of Platforms for System-on-Chip Development, Migration and Debug: indeed, the Cortus world-tiniest 32-bit mostly RISC processor, now is enriched with the "PRemier Interactive Development Environment" PRIDE™ which benefits from the patented Real-Time debugger BIRD™ and the SUCCESS™ cosimulator.

About CORTUS SA

Cortus S.A. is a privately owned French company developing compact, ultra low power 32-bit RISC processors for embedded applications. Our IP provides the flexibility of an efficient soft core matched with a specialized instruction set extension through high performance concurrent coprocessors. Products come with a set of peripherals and a customized version of the GNU C and C++ compiler and tool chain running on Linux, Windows XP and many Unix varieties. The company is based in Montpellier, France with offices in Silicon Valley, CA and can be reached at +33 4.67.13.01.90, or <http://www.cortus.com>

APS is a trademark of CORTUS SA

About DOLPHIN INTEGRATION

This Provider of virtual components of Silicon IP uses its SESAME™ library of RCSL standard cells to deliver logic and analog circuits and embedded memories at the hard level of GDS-II with proven high quality. Their demanding user base comprises mostly the growing Fabless companies worldwide. They promote advanced design processes with their Missing EDA Links for multi-level simulation analysis and verification of complex integrated circuits up to multi-domain designs: mechatronics...

About RAISONANCE SA

Founded in 1988, Raisonance S.A. is based near Grenoble in the French Alps. The company is a specialist developer of tools for microcontrollers and SoC, and offers the most comprehensive range of tools from C Compilers to real-time emulators. By introducing innovative and unique solutions, Raisonance provides high quality dedicated products to suit the specific needs for the embedded market. Raisonance development tools are distributed and supported worldwide.
